Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

THE AMERICAN NATURALIST

A MONTHLY JOURNAL
DEVOTED TO THE NATURAL SCIENCES
IN THEIR WIDEST SENSE

CONTENTS

		PAGE
I.	**The Present Status of Anatomy** Professor J. PLAYFAIR McMURRICH	185
II.	**The Second Annual Meeting of the Society for Plant Morphology and Physiology** . . . . . Professor ERWIN F. SMITH	199
III.	**The Ossicula Auditus and Mammalian Ancestry** Professor J. S. KINGSLEY and W. H. RUDDICK	219
IV.	**Desmognathus Fusca (Rafinesque) and Spelerpes Bilineatus (Green)** Professor HARRIS H. WILDER	231
V.	**The Poisons Given Off by Parasitic Worms in Man and Animals** Dr. G. H. F. NUTTALL	247
VI.	**A Curious Malformation of the Shields on a Snake's Head** Dr. LEONHARD STEJNEGER	251
VII.	**Editorial:** The Society of Morphologists, The American Journal of Physiology, Laws of Priority	253
VIII.	**Reviews of Recent Literature:** *Anthropology:* The Origin of Culture — *General Biology:* Embryos without Maternal Nuclei; Temperature and Rate of Regeneration; Organisms and Oxygen; The Phylogenetic Significance of Protozoan Nuclei; The Plotting of Biological Data — *Zoology:* Relationships of North American Grouse and Quail; Gegenbaur's Comparative Anatomy of Vertebrates; The Natural History and Morphology of Dero vaga; Crustacea of Florida and the Bahamas; Entomostraca of Karelia; Notes — *Botany:* Some Recent Text-Books; The Gametophyte of Botrychium virginianum; Proteolytic Enzyme of Nepenthes; Nucleus of the Yeast Plant; Botanical Notes — *Paleontology:* Cretaceous Foraminifera of New Jersey; Cretaceous and Tertiary Plants; Miocene Flora; Permian Flora; Cretaceous Cycads — *Geology:* Maryland Geological Survey — *Petrography:* Granites and Diabases; Granitic Oceanic Islands and the Nature of Laterite; Isenite and Intermediate Types of Volcanic Rocks; Dike Rocks of Portland, Me.; Notes	255 256 259 269 275 277 279
IX.	**News**	282
X.	**Publications Received**	285

THE AMERICAN NATURALIST is an illustrated monthly magazine of Natural History, and will aim to present to its readers the leading facts and discoveries in Anthropology, General Biology, Zoology, Botany, Paleontology, Geology and Physical Geography, and Mineralogy and Petrography. The contents each month will consist of leading original articles containing accounts and discussions of new discoveries, reports of scientific expeditions, biographical notices of distinguished naturalists, or critical summaries of progress in some line; and in addition to these there will be briefer articles on various points of interest, editorial comments on scientific questions of the day, critical reviews of recent literature, and a final department for scientific news and personal notices.

All naturalists who have anything interesting to say are invited to send in their contributions, but the editors will endeavor to select for publication only that which is of truly scientific value and at the same time written so as to be intelligible, instructive, and interesting to the general scientific reader.

All manuscripts, books for review, exchanges, etc., should be sent to THE AMERICAN NATURALIST, Cambridge, Mass.

All business communications should be sent direct to the publishers.

Annual subscription, $4.00, net, in advance. Single copies, 35 cents.
Foreign subscription, $4.60.
